

# RAHUL REDDY PATLOLLA

STUDENT

## PROFILE

I am a passionate student of computer science engineering with gain interest in animation and storytelling, character, design, and game development. I strive to combine and creativity with technical skills to create engagement, user experiences. I am skilled in the areas of front and back – ended development, data, visualisation, and programming languages, with an emphasis on innovation with technology.

## PROJECTS

### SEED TO PLATE

- Developed and maintained a mobile application designed to connect consumers with local farmers for the delivery of fresh, high-quality produce. Implemented features for seamless product ordering, real-time tracking, and secure payment processing, enhancing customer experience and supporting local agriculture.

### HOSTEL MANAGEMENT SYSTEMt

- Developed and managed an app for streamlining hostel operations, including room booking, availability tracking, fee management, and communication between staff and residents. Implemented features for efficient check-ins/check-outs, room assignment, and payment processing, improving overall operational efficiency and user experience.
